Great insight into the stars personal lives.

This book tells the personal beliefs of many many movie and television stars. It is very entertaining and all the quotes are indexed with their source for further study.

I believe it's a hit!

This is an excellently written book. Ray Comfort has a flair for words. As usual, he is entertaining and informative. People just love to know everything about Hollywood celebrities, but how often do you hear about their beliefs? Great concept for a book.

Hollywood is Weird

I found the book very interesting. The content flowed without getting boring. The format is one of small sections and it is very easy to find out about your favorite stars beliefs quickly. Some folks believe some strange things! Most of the big names are covered. You'll like it.

This is probably of the best books spiritually, intellectually, and entertainingly(I don't know if that's a word). It was fun to read about almost any celebrity in Hollywood or TV. You can find anyone famous in this book easily. Ray Comfort does a great job talking about their spiritual beliefs. This is a must have book. Go get it now!

Behind the glitz

Since reading this book I have read almost all the author's other books. Though not based on the beliefs of those in Hollywood all are excellent reads. What Hollywood Believes tells the truth about what really happens after we pass on in this life. Remember, we live a lot longer in the next life than in this one!

Amazing

It was interesting to see points of view of different Hollywood stars, and surprising to see what some of them think. The commentaries following some of the quotes was interesting and helpful. It may help answer some questions readers have about faith.

Wow! Incredible! Awesome book on the faith of the famous!

It is amazing to see just how many big name Hollywood stars are in this book. Ray Comfort does an extraordinary job of finding out the faith of the famous. He uses their beliefs and compares that to the plumb line of Scripture. Excellent book, I highly recommend it!

What Hollywood Believes is amazing!!!

If you like to read any sort of magazine about Hollywood stars or like to watch E! then you will really appreciate this book! Or if you are just a spiritual person, it will interest you to see what the masses are thinking and saying. This book has quotes and things you would never know or believe. It was very informative and some of the things I read I had to say, 'You believe that? C'mon!' While others I was like 'Wow! I would have never thought you even had a conscience.' It has a lot of quotes. Very very good!

Also recommended: No other book like this book that I can compare to.

ACTORS DIE TOO

Actors have a lot of money and a lot of fame but they have very few answers. Great book let's you in on actors real views of what's important and reveals that they are just like everyone else. Makes people think about the true hopelessness of life and death without Jesus Christ.

Very telling

I was amazed at the lack of depth in certain people in Hollywood. Some are so thin I'm not sure they even believe that Hollywood exists.

For The Enquiring Mind

This book was a quick and interesting read; I enjoyed learning that the famous also believe in God, even if they don't claim to have all the answers. Ray does a fine job not judging but using the quotes to share Bible answers.

More informative than Entertainment Tonight

It is very rare that you get this close and intimate with the stars. This is information from their own hearts, not some journalist opinion in order to sensationalize a story. I love it and would love to see a sequel.

Meaningless, meaningless

Chase after the wind. So many have built their treasures on earth...no wonder Jesus warned against the deception of riches. This book is definitely a good witness tool for those whom you've had on your prayer list a long time, but are wondering how to encounter them! Even relatives will dive into this book!

Great Book, Lots of Info

This is a great book for those who love to delve into what's going on in Hollywood. The faith of Hollywood is something that is often overlooked. The author has done his research.

An easy read with an important message

The book is chock full of quotes of celebrities on spiritual matters and Ray uses their quotes for an opportunity to highlight either the truths or the errors in their thoughts. In the process

he explains the truth of the gospel of Jesus Christ. I found the book entertaining and inspirational.

An Extremely Entertaining & Easy Read! A Must For The Movie Lover.

Recently I purchased two copies of this book. One for myself and one as a birthday present for a movie lover with a massive DVD collection. I thought it would be the perfect gift, focusing on her favorite entertainment, celebrities. I picked a winner. She absolutely loved it and is normally not much of a "book person" nor typically interested in things of a religious nature. This struck her fancy, big time. I then began reading my own copy and found it much more entertaining than I expected, being that I am not half the movie lover she is. Right off I was intrigued by some of the names I was finding in the table of contents. Bob Dylan, John Lennon, Stephen King, Alice Cooper, Tom Cruise, Charlie Chaplin and Christopher Reeve were just a few names that caught my eye. It would be interesting to have a look inside their heads to see what makes them tick. I wondered though, if it would read like a tabloid. Quickly I found that not to be the case, as the author seems to have done his homework, in many cases using quotes from the celeb's themselves, on just what it is they believe and how they came to that conclusion. Regardless of who you are a fan of, you will raise an eyebrow or two at some of these candid quotes on the often unheard of beliefs in Hollywood. This will definitely be making it into the hands of a few more friends of mine for Christmas. I would highly recommend this to anyone with an interest in celebrities, although that is by no means a prerequisite for enjoying this book. I think just about anyone would find it intriguing and it's a great gift for an office grab-bag too! Keep a copy on the coffee table when you have guests. They'll love it!

Excellent Book!!

Ray Comfort takes you on a journey past the glamour and facade to the inner rooms of Hollywood's biggest stars. You will discover celebrity's most intimate comments about their faith and questions they struggle with like the rest of us. Realize that God is not as difficult a subject to talk about as you think - people are interested in it!

What? No venom? No surprise.

What a pleasure to read something from contemporary Christendom that so nicely reflects Christ. No nasty invective here, just gracious 'reporting' and commentary.
